

Certification Assessment

Name: _____ Date: _____

Location: _____ Score: _____

- 1 What is the primary purpose of this SOP?**
 - A. To outline the cleaning procedures for equipment
 - B. To visually inspect for damages
 - C. To train employees on material handling
 - D. To establish safety standards

- 2 Which personal protective equipment (PPE) is required during visual inspections?**
 - A. Steeltoe boots and gloves
 - B. Eye protection (safety glasses) and hearing protection
 - C. Respiratory protection and face shield
 - D. Hard hat and cutresistant gloves

- 3 What tool is used to clean the pin threads?**
 - A. Die grinder
 - B. Angle grinder
 - C. Power drill
 - D. Sawzall

- 4 What is the purpose of a depth gauge during inspection?**
 - A. To measure the length of material
 - B. To check for damage on the ends
 - C. To measure internal and external pitting

D. To gauge thread depth and condition

5 Which of the following should be inspected on the outer diameter (OD)?

A. Internal pitting

B. Rod cuts

C. Slip cuts and external pitting

D. Material coating

6 How should the inner diameter (ID) of materials be inspected?

A. By using a thread gauge

B. By cleaning with a grinder

C. By using a flashlight

D. By checking external markings

7 What should be done to inspect threads for damage?

A. Measure the length of the threads

B. Use a thread gauge to check their condition

C. Clean them with a depth gauge

D. Apply a protective coating

8 What tool is recommended to buff out the box threads?

A. Impact drill

B. Die grinder

C. Sawzall

D. Depth gauge
